Subject: Microsoft Settlement

I would like to voice my opinion against the proposed settlement in the Microsoft case. After reading the relevant documents, I have concluded that the remedy in no way fits the crime and conviction. There is no real punishment for past ill-gotten gains, nor is there any real material substance in preventing MS from engaging in prior illegal practices in new markets.

I agree much more with the alternative settlements offered by the opposing states.

I thank you for taking my opinion into consideration.

Sincerely

Scott Schmidt
